

## **Maven Best Practices**

Version 1.18-SNAPSHOT

2018-10-30

# **Table of Contents**

1. Config files location	2
2. Checkstyle : check javadoc	2
3. Add version and date to Asciidoc PDFs	3
4. Javadoc generation with UML diagrams	4
5. Install provided dependencies in local repository	5
6. To generate AsciiDoc PDF files	6
7. SonarQube with Jacoco for coverage	6
8. Appendix	0
8.1. Revision marks	0

Table 1. History

Date	Author	Detail
2018-08-29	bcouetil	Asciidoc HTML look & feel changes
2018-08-24	bcouetil	Icones added for download + favicon added for webpage
2018-08-23	bcouetil	Initial commit

## 1. Config files location

Config files have to be put in the right folder in Eclipse.

- src/main/resources/
  - Only files that will is not likely to be modified, because it will be in the jar
- config/
  - Files that is likely to be modified on IS
  - Don't forget to put them manually on IS
- src/test/resources/
  - File used in JUnit tests only for this sub-module
- ../src/test/shared-resources
  - Files used in JUnit tests accross multiple modules
  - It requires some maven configuration :

pom.xml plugin for shared-resources

```
<plugin>
  <groupId>org.codehaus.mojo
  <artifactId>build-helper-maven-plugin</artifactId>
  <version>3.0.0
  <executions>
    <execution>
     <id>add-test-resources</id>
     <phase>generate-test-resources</phase>
       <qoal>add-test-resource</qoal>
     </goals>
     <configuration>
       <resources>
         <resource>
           <directory>${project.parent.basedir}/src/test/shared-resources</directory>
       </resources>
     </configuration>
   </execution>
  </executions>
</plugin>
```

Never write programmatically files outside of **target**/ directory, for the sake of source code management

## 2. Checkstyle: check javadoc

With Checkstyle, you can enforce continuous javadoc check

### pom.xml plugin

```
<!-- checkstyle to fail the build on javadoc warnings -->
<!-- to skip : mvn install -Dcheckstyle.skip=true -->
<plugin>
  <groupId>org.apache.maven.plugins
  <artifactId>maven-checkstyle-plugin</artifactId>
  <version>2.17</version>
  <executions>
   <execution>
     <id>validate</id>
     <phase>validate</phase>
     <configuration>
       <configLocation>checkstyle-javadoc.xml</configLocation>
       <encoding>UTF-8</encoding>
       <consoleOutput>true</consoleOutput>
       <failsOnError>true</failsOnError>
       <linkXRef>false</linkXRef>
     </configuration>
     <goals>
       <goal>check</goal>
     </goals>
   </execution>
  </executions>
</plugin>
```

### checkstyle-javadoc.xml to be created in the root project

### 3. Add version and date to Asciidoc PDFs

```
<plugins>
  <plugin>
   <groupId>org.codehaus.mojo
   <artifactId>buildnumber-maven-plugin</artifactId>
   <version>1.2</version>
   <executions>
     <execution>
       <phase>validate</phase>
         <goal>create-timestamp</poal>
        </goals>
     </execution>
   </executions>
   <configuration>
     <timestampFormat>yyyy-MM-dd</timestampFormat>
     <timestampPropertyName>build.date</timestampPropertyName>
   </configuration>
 </plugin>
  <!-- Ant tasks plugin -->
  <!-- single usage : mvn antrun:run -->
   <groupId>org.apache.maven.plugins
   <artifactId>maven-antrun-plugin</artifactId>
    <version>1.7</version>
    <inherited>true</inherited>
   <executions>
     <execution>
       <!-- add version to generated pdf filenames -->
       <id>pdfsAddVersion</id>
       <configuration>
         <failOnError>false</failOnError>
         <target name="add version and date to all generated pdf filenames">
           <move todir="${project.build.directory}/generated-docs" includeemptydirs="false">
             <fileset dir="${project.build.directory}/generated-docs" />
              <mapper type="glob" from="*.pdf" to="*_V${project.version}_${build.date}.pdf" />
         </target>
       </configuration>
        <goals>
         <goal>run</goal>
       </goals>
     </execution>
   </executions>
  </plugin>
</plugins>
```

## 4. Javadoc generation with UML diagrams

### pom.xml

```
<!-- javadoc html, fix or generate -->
<plugin>
 <groupId>org.apache.maven.plugins
 <artifactId>maven-javadoc-plugin</artifactId>
 <version>2.10.4
 <configuration>
   <!-- usage : javadoc:javadoc or javadoc:jar -->
   <show>public</show>
   <reportOutputDirectory>${project.reporting.outputDirectory}</reportOutputDirectory>
   <destDir>javadoc</destDir>
   <!-- for UML diagram in javadoc:javadoc -->
   <!-- Locally : need http://www.graphviz.org/Download_windows.php to work -->
   <!-- and add "C:\Program Files (x86)\Graphviz\bin" to windows path -->
   <doclet>org.umlgraph.doclet.UmlGraphDoc</doclet>
   <docletArtifact>
     <groupId>org.umlgraph
     <artifactId>umlgraph</artifactId>
     <version>5.6.6
   </docletArtifact>
   <additionalparam>-views -attributes -visibility -types -enumerations -enumconstants</additionalparam>
   <useStandardDocletOptions>true</useStandardDocletOptions>
 </configuration>
</plugin>
```

# 5. Install provided dependencies in local repository

### pom.xml

```
<plugins>
  <!-- install WM jars in local repository -->
  <!-- part of mvn clean because maven check them early in the process -->
  <plugin>
   <groupId>org.apache.maven.plugins
   <artifactId>maven-install-plugin</artifactId>
   <version>2.5.2
   <!-- We do not want children attempting to install these jars to the repository -->
   <inherited>false</inherited>
   <executions>
     <execution>
       <id>wm-isclient95</id>
       <phase>clean</phase>
         <goal>install-file</goal>
       </goals>
       <configuration>
         <file>lib/wm9.5/wm-isclient-9.5.jar</file>
         <groupId>webmethods
         <artifactId>wm-isclient</artifactId>
         <version>9.5</version>
         <packaging>jar</packaging>
       </configuration>
     </execution>
  </plugin>
</plugins>
```

### 6. To generate AsciiDoc PDF files

See Asciidoc Best Practices

## 7. SonarQube with Jacoco for coverage

https://www.sonarqube.org

SonarQube ensures code quality with static analysis and Jacoco checks code coverage.

### pom.xml properties

#### pom.xml without powermock static

```
<dependencies>
 <!-- For unit tests coverage in Sonar -->
   <groupId>org.sonarsource.java
   <artifactId>sonar-jacoco-listeners</artifactId>
   <version>4.9.0.9858
   <scope>test</scope>
 </dependency>
</dependencies>
<plugins>
 <!-- SonarQube -->
 <plugin>
   <groupId>org.codehaus.mojo
   <artifactId>sonar-maven-plugin</artifactId>
   <version>3.2</version>
 </plugin>
 <!-- handling unit tests coverage with Jacco -->
   <groupId>org.jacoco
   <artifactId>jacoco-maven-plugin</artifactId>
   <version>0.8.0
   <executions>
     <execution>
       <id>pre-unit-test</id>
       <phase>test-compile</phase>
         <goal>prepare-agent</goal>
       </goals>
       <configuration>
```

```
<destFile>${sonar.jacoco.reportPath}</destFile>
       <dataFile>${sonar.jacoco.reportPath}</dataFile>
       <append>true</append>
     </configuration>
   </execution>
   <execution>
     <id>prepare-jacoco-agent-it</id>
     <phase>pre-integration-test</phase>
       <goal>prepare-agent-integration</poal>
     </goals>
     <configuration>
       <destFile>${sonar.jacoco.itReportPath}</destFile>
       <dataFile>${sonar.jacoco.itReportPath}</dataFile>
       <append>true</append>
     </configuration>
   </execution>
 </executions>
</plugin>
<!-- Unit Tests -->
<plugin>
 <groupId>org.apache.maven.plugins
 <artifactId>maven-surefire-plugin</artifactId>
 <!-- version 2.19.1 is broken on jenkins -->
 <version>2.18.1
 <configuration>
   <testFailureIgnore>false</testFailureIgnore>
   <run0rder>alphabetical</run0rder>
   <skipTests>${custom.ut.skip}</skipTests>
   cproperties>
     cproperty>
       <name>listener</name>
       <value>org.sonar.java.jacoco.JUnitListener
     </property>
   </properties>
  </configuration>
</plugin>
<!-- Integration Tests -->
 <groupId>org.apache.maven.plugins
 <artifactId>maven-failsafe-plugin</artifactId>
 <!-- version 2.19.1 is broken on jenkins -->
 <version>2.18.1
 <configuration>
   <run0rder>alphabetical</run0rder>
   cproperties>
     cproperty>
       <name>listener</name>
       <value>org.sonar.java.jacoco.JUnitListener</value>
     </property>
   </properties>
 </configuration>
 <executions>
   <execution>
     <id>integration-tests</id>
     <phase>integration-test</phase>
       <goal>integration-test
     </goals>
   </execution>
   <!-- to exit in error on test fail -->
   <execution>
     <id>verify</id>
     <phase>verify</phase>
     <goals>
       <goal>verify</goal>
     </goals>
   </execution>
```

```
</executions>
</plugin>
</plugins>
```

pom.xml with powermock: instrumentation in conflict, offline jacoco instrumentation is needed

```
<dependencies>
 <!-- For unit tests coverage in Sonar -->
 <dependency>
   <groupId>org.jacoco</groupId>
   <artifactId>org.jacoco.agent</artifactId>
   <classifier>runtime</classifier>
   <version>0.8.0
   <scope>test</scope>
 </dependency>
</dependencies>
<plugins>
 <!-- SonarQube -->
 <plugin>
   <groupId>org.codehaus.mojo
   <artifactId>sonar-maven-plugin</artifactId>
   <version>3.2</version>
 </plugin>
 <!-- handling unit tests coverage with Jacco -->
 <!-- offline instrumentation is mandatory when using other instrumentation framework such as PowerMock -->
 <!-- https://github.com/powermock/powermock/wiki/Code-coverage-with-JaCoCo -->
 <!-- to separate UT and IT : -->
 <!-- (1) mvn test jacoco:restore-instrumented-classes -->
 <!-- (2) mvn install -Dcustom.ut.skip=true -Dcheckstyle.skip=true -->
 <plugin>
   <groupId>org.jacoco
   <artifactId>jacoco-maven-plugin</artifactId>
   <version>0.8.0
   <executions>
     <execution>
       <id>jacoco-instrument</id>
       <phase>test-compile</phase>
       <goals>
         <goal>instrument
       </goals>
       <configuration>
         <skip>${skipTests}</skip>
       </configuration>
     </execution>
     <execution>
       <id>jacoco-restore-instrumented-classes</id>
       <phase>post-integration-test</phase>
       <goals>
         <goal>restore-instrumented-classes
       </goals>
       <configuration>
         <skip>${skipTests}</skip>
       </configuration>
     </execution>
   </executions>
 </plugin>
   <!-- Unit Tests -->
 <plugin>
   <groupId>org.apache.maven.plugins
   <artifactId>maven-surefire-plugin</artifactId>
   <!-- version 2.19.1 is broken on jenkins -->
   <version>2.18.1
```

```
<configuration>
     <testFailureIgnore>false</testFailureIgnore>
     <run0rder>alphabetical</run0rder>
     <skipTests>${custom.ut.skip}</skipTests>
     <systemPropertyVariables>
       <jacoco-agent.destfile>${jacoco.reportPath}</jacoco-agent.destfile>
     </systemPropertyVariables>
   </configuration>
  </plugin>
 <!-- Integration Tests -->
  <!-- usage full test : mvn integration-test -->
  <!-- usage only IT (but does not fill jacoco-it) : mvn test-compile failsafe:integration-test -->
   <groupId>org.apache.maven.plugins
   <artifactId>maven-failsafe-plugin</artifactId>
   <!-- version 2.19.1 is broken on jenkins -->
   <version>2.18.1
   <configuration>
     <run0rder>alphabetical</run0rder>
     <systemPropertyVariables>
