

## **Maven Best Practices**

Version 1.18-SNAPSHOT

2018-08-22

## **Table of Contents**

1. Config files location	2
2. Checkstyle : check javadoc	2
3. Add version and date to Asciidoc PDFs	3
4. Javadoc generation with UML diagrams	1
5. Install provided dependencies in local repository5	5
6. To generate AsciiDoc PDF files	3
7. SonarQube with Jacoco for coverage6	3
8. Appendix	L
8.1. Revision marks	L

### Table 1. History

Date	Author	Detail
2018-08-22	NeVraX	HTML Asciidoc to Github

### 1. Config files location

Config files have to be put in the right folder in Eclipse.

- src/main/resources/
  - Only files that will is not likely to be modified, because it will be in the jar
- config/
  - Files that is likely to be modified on IS
  - Don't forget to put them manually on IS
- src/test/resources/
  - File used in JUnit tests only for this sub-module
- ../src/test/shared-resources
  - Files used in JUnit tests accross multiple modules
  - requires some maven configuration

TODO give Maven details for shared-resources

## 2. Checkstyle: check javadoc

With Checkstyle, you can enforce continuous javadoc check

pom.xml plugin

```
<!-- checkstyle to fail the build on javadoc warnings -->
<!-- to skip : mvn install -Dcheckstyle.skip=true -->
<plugin>
   <groupId>org.apache.maven.plugins
   <artifactId>maven-checkstyle-plugin</artifactId>
   <version>2.17</version>
   <executions>
       <execution>
            <id>validate</id>
            <phase>validate</phase>
            <configuration>
               <configLocation>checkstyle-javadoc.xml</configLocation>
               <encoding>UTF-8</encoding>
               <consoleOutput>true</consoleOutput>
               <failsOnError>true</failsOnError>
               <linkXRef>false</linkXRef>
            </configuration>
            <goals>
               <goal>check</goal>
            </goals>
        </execution>
   </executions>
</plugin>
```

### checkstyle-javadoc.xml to be created in the root project

```
<?xml version="1.0"?>
<!DOCTYPE module PUBLIC
    "-//Puppy Crawl//DTD Check Configuration 1.2//EN"
    "http://www.puppycrawl.com/dtds/configuration_1_2.dtd">

<module name="Checker">
    <module name="TreeWalker">
        <module name="JavadocMethod"/>
        <module name="JavadocType"/>
        <module name="JavadocVariable"/>
        <module name="JavadocStyle"/>
        <module name="JavadocStyle"/>
        <module>
</module>
```

### 3. Add version and date to Asciidoc PDFs

```
<plugins>
   <plugin>
       <groupId>org.codehaus.mojo
       <artifactId>buildnumber-maven-plugin</artifactId>
       <version>1.2</version>
       <executions>
           <execution>
               <phase>validate</phase>
                   <goal>create-timestamp</poal>
                </goals>
           </execution>
       </executions>
       <configuration>
           <timestampFormat>yyyy-MM-dd</timestampFormat>
           <timestampPropertyName>build.date</timestampPropertyName>
       </configuration>
   </plugin>
   <!-- Ant tasks plugin -->
   <!-- single usage : mvn antrun:run -->
       <groupId>org.apache.maven.plugins
       <artifactId>maven-antrun-plugin</artifactId>
        <version>1.7</version>
       <inherited>true</inherited>
       <executions>
           <execution>
               <!-- add version to generated pdf filenames -->
               <id>pdfsAddVersion</id>
               <configuration>
                   <failOnError>false</failOnError>
                   <target name="add version and date to all generated pdf filenames">
                       <move todir="${project.build.directory}/generated-docs" includeemptydirs="false">
                           <fileset dir="${project.build.directory}/generated-docs" />
                           <mapper type="glob" from="*.pdf" to="*_V${project.version}_${build.date}.pdf" />
                   </target>
               </configuration>
                   <goal>run</goal>
               </goals>
           </execution>
       </executions>
   </plugin>
</plugins>
```

## 4. Javadoc generation with UML diagrams

### pom.xml

```
<!-- javadoc html, fix or generate -->
<plugin>
   <groupId>org.apache.maven.plugins
   <artifactId>maven-javadoc-plugin</artifactId>
   <version>2.10.4
   <configuration>
       <!-- usage : javadoc:javadoc or javadoc:jar -->
       <show>public</show>
       <reportOutputDirectory>${project.reporting.outputDirectory}/reportOutputDirectory>
       <destDir>javadoc</destDir>
       <!-- for UML diagram in javadoc:javadoc -->
       <!-- Locally : need http://www.graphviz.org/Download_windows.php to work -->
       <!-- and add "C:\Program Files (x86)\Graphviz\bin" to windows path -->
       <doclet>org.umlgraph.doclet.UmlGraphDoc</doclet>
       <docletArtifact>
           <groupId>org.umlgraph
           <artifactId>umlgraph</artifactId>
           <version>5.6.6
       </docletArtifact>
       <additionalparam>-views -attributes -visibility -types -enumerations -enumconstants</additionalparam>
       <useStandardDocletOptions>true</useStandardDocletOptions>
   </configuration>
</plugin>
```

# 5. Install provided dependencies in local repository

### pom.xml

```
<plugins>
   <!-- install WM jars in local repository -->
   <!-- part of mvn clean because maven check them early in the process -->
   <plugin>
       <groupId>org.apache.maven.plugins
       <artifactId>maven-install-plugin</artifactId>
       <version>2.5.2
       <!-- We do not want children attempting to install these jars to the repository -->
       <inherited>false</inherited>
       <executions>
           <execution>
               <id>wm-isclient95</id>
               <phase>clean</phase>
               <goals>
                   <goal>install-file</goal>
               </goals>
               <configuration>
                   <file>lib/wm9.5/wm-isclient-9.5.jar</file>
                   <groupId>webmethods
                   <artifactId>wm-isclient</artifactId>
                   <version>9.5</version>
                   <packaging>jar</packaging>
               </configuration>
           </execution>
    </plugin>
</plugins>
```

### 6. To generate AsciiDoc PDF files

pom.xml

```
<plugins>
   <!-- to generate asciidoc pdf documents -->
   <!-- part of mvn install -->
   <!-- single usage : mvn asciidoctor:process-asciidoc -->
   <!-- We don't bind it to the official phase to choose the moment in Jenkins pipeline -->
   <pluain>
       <groupId>org.asciidoctor
       <artifactId>asciidoctor-maven-plugin</artifactId>
       <version>1.5.5
       <dependencies>
           <denendency>
               <groupId>org.asciidoctor
               <artifactId>asciidoctorj-pdf</artifactId>
               <version>1.5.0-alpha.14
           </dependency>
           <dependency>
               <groupId>org.asciidoctor/groupId>
               <artifactId>asciidoctorj-diagram</artifactId>
               <version>1.5.4
           </dependency>
       </dependencies>
       <configuration>
           <backend>pdf</backend>
           <sourceDirectory>src/docs/asciidoc</sourceDirectory>
           <sourceHighlighter>rouge</sourceHighlighter>
               <require>asciidoctor-diagram</require>
           </requires>
           <!-- Attributes common to all output formats -->
               <imagesdir>${project.build.directory}/generated-docs/images/imagesdir>
               <pdf-style>${user.dir}/src/docs/asciidoc/themes/cg-theme.yml</pdf-style></pdf-style>
               <icons>font</icons>
               <pagenums />
               <toc />
               <idprefix />
               <idseparator>-</idseparator>
               <!-- custom -->
               <source-dir>../../main/java</source-dir>
               <test-dir>.../../test/java</test-dir>
               cyroject-version>${project.version}
               <root-project-dir>${user.dir}</root-project-dir>
               <history-dir>${project.build.directory}/generated-docs/history/history-dir>
               <project-images-dir>${project.basedir}/src/main/resources/images/project-images-dir>
           </attributes>
       </configuration>
   </plugin>
</plugins>
```

## 7. SonarQube with Jacoco for coverage

https://www.sonarqube.org

SonarQube ensures code quality with static analysis and Jacoco checks code coverage.

#### pom.xml properties

### pom.xml without powermock static

```
<dependencies>
   <!-- For unit tests coverage in Sonar -->
   <dependency>
       <groupId>org.sonarsource.java
       <artifactId>sonar-jacoco-listeners</artifactId>
       <version>4.9.0.9858
       <scope>test</scope>
   </dependency>
</dependencies>
<plugins>
   <!-- SonarQube -->
   <plugin>
       <groupId>org.codehaus.mojo
       <artifactId>sonar-maven-plugin</artifactId>
       <version>3.2</version>
   </plugin>
   <!-- handling unit tests coverage with Jacco -->
       <groupId>org.jacoco
       <artifactId>jacoco-maven-plugin</artifactId>
       <version>0.8.0
       <executions>
           <execution>
               <id>pre-unit-test</id>
               <phase>test-compile</phase>
               <goals>
                   <goal>prepare-agent</goal>
               </goals>
               <configuration>
                   <destFile>${sonar.jacoco.reportPath}</destFile>
                   <dataFile>${sonar.jacoco.reportPath}</dataFile>
                   <append>true</append>
               </configuration>
           </execution>
           <execution>
               <id>prepare-jacoco-agent-it</id>
               <phase>pre-integration-test</phase>
               <goals>
                   <goal>prepare-agent-integration</poal>
               </goals>
                   <destFile>${sonar.jacoco.itReportPath}</destFile>
                   <dataFile>${sonar.jacoco.itReportPath}</dataFile>
                   <append>true</append>
               </configuration>
```

```
</execution>
   </plugin>
   <!-- Unit Tests -->
   <plugin>
       <groupId>org.apache.maven.plugins
       <artifactId>maven-surefire-plugin</artifactId>
       <!-- version 2.19.1 is broken on jenkins -->
       <version>2.18.1
       <configuration>
           <testFailureIgnore>false</testFailureIgnore>
           <run0rder>alphabetical</run0rder>
           <skipTests>${custom.ut.skip}</skipTests>
           cproperties>
               cproperty>
                   <name>listener</name>
